## TANNING FACILITY PERMIT APPLICATION

If a Tanning Facility has an existing disciplinary action, a change of ownership or name change cannot take place until the action has been closed. You may contact the Board office to verify the status of a license.

If establishing a tanning facility within a salon a separate application and fee is required.

Upon receipt and approval of the application, a State Board Inspector will contact you to arrange an opening inspection. You are not permitted to open for business until you received an approved Inspection by the Ohio State Board of Cosmetology.

If the permit cannot be delivered, it will be returned to the Board office as undeliverable. If you have not received your permit within fifteen (15) days of the approved inspection, please contact the Board office.

### **Tanning Facility Permit must be received prior to opening business.**

Tanning Facilities are required to follow the laws and rules found in Chapter 4713 of the Ohio Revised Code and Chapter 4713 of the Ohio Administrative Code.

[CLICK HERE](#) to view the Laws and rules.

Tanning Facilities are required (ORC 4713.082) to post the Tanning Facility Standards provided by the Board in a public and conspicuous place in the salon.

[CLICK HERE](#) to access a copy of the standards.

Each tanning facility is required to have an operator who possesses a valid and current certificate of formal training, (as defined in Chapter 4713 of the Ohio the Administrative Code), on duty at all times. Formal training courses for operators must meet the requirements of the Ohio Administrative Code. A board approved certificate shall be maintained within the facility and be available for inspection upon request. [CLICK HERE](#) to view requirements.

Tanning Facility Permits are not transferable between owners or locations.

**The completed application and required fee must be mailed to:**

# Tanning Risks and Important Information

## **Ultraviolet Radiation - Cancer Risk**

According to the Centers for Disease Control (CDC), indoor tanning exposes users to UV-A and UV-B radiation and has been linked with skin cancers including melanoma (the deadliest type of skin cancer), squamous cell carcinoma, and basal cell carcinoma, and cancers of the eye (ocular melanoma). Indoor tanning is particularly dangerous for younger users; people who begin indoor tanning during adolescence or early adulthood have a higher risk of getting melanoma.

The product is contraindicated for use on persons under the age of 18 years; the product must not be used if skin lesions or open wounds are present; the product should not be used on people who have had skin cancer or a family history of skin cancer; and people repeatedly exposed to UV radiation should be regularly evaluated for skin cancer. **A contraindication means that the product is not indicated for use on persons under the age of 18 years of age.**

## **According to the American Academy of Dermatology and Ohio Dermatological Association:**

The body needs a strong immune system to protect one from developing infections and cancers of all types. Children have immature immune systems, and the damage continues to accumulate across the lifespan. Meaning, the earlier the exposure to tanning radiation and the more exposure that occurs, the earlier the damage that will occur and the worse it will be.

## **Avoid Overexposure**

Overexposure may cause skin injury, eye injury, and possible allergic reactions. Tanning radiation ages the skin and can result in premature wrinkles and other damage to the skin, such as skin cancer. Repeated overexposure may cause aging of the skin, dryness, has been linked to skin cancer. It is recommended not to tan outdoors on days when you are tanning indoors, or if you currently have a sunburn.

## **Ultraviolet Radiation Sensitivity (Photosensitivity: unusual and unexpected**

### **increased sensitivity to ultraviolet rays.)**

The use of various drugs, food items, makeup, lotions, and some sunscreen products contain ingredients that may have a photosensitizing effect with the use of ultraviolet tanning equipment. Customers with any known medical conditions or customers who are currently taking any medications should consult their physician or pharmacist before using ultraviolet tanning equipment.

## **Protective Eyewear**

Failure to wear protective eyewear can result in severe burns or injury to the eyes, in addition to premature cataracts, glaucoma, macular degeneration and blindness.

## **Skin Typing**

Skin typing is a required assessment that is used to determine the appropriate tanning exposure schedule for an individual. The types of questions presented on the assessment are about sun sensitivity, natural coloring, recent tanning history, medications, and medical history. Each response is given a numerical value, after the certified operator reviews the questions with the client. The answers are tallied and an individual's sun sensitivity is determined by a score of 1-6. This level of sun sensitivity can then be used when utilizing the manufacturer's printed label for suggested tanning time.

## **Certified Operator**

A certified operator is an employee of a tanning facility who has successfully completed and passed a board approved training course and holds a board approved certificate. Every tanning facility is required to have a certified operator on duty at all times.

OHIO STATE BOARD OF COSMETOLOGY
TANNING CONSENT FORM

Signature on the consent form below is an indication that I have read and understand the risks factors of ultraviolet radiation and overexposure contained on the "Tanning Risks and Important Information" sheet provided. I understand that certain medical conditions and/or medications may cause a photosensitivity of the skin. I further understand that failure to wear protective eyewear may result in sever burns or injury to the eyes. It is also my understanding that a certified tanning operator must perform a skin typing assessment prior to tanning to determine an individualized exposure schedule.

Notice: According to the Centers for Disease Control (CDC), indoor tanning exposes users to UV-A and UV-B radiation and has been linked with skin cancers including melanoma (the deadliest type of skin cancer), squamous cell, and basal cell carcinoma, and cancers of the eye (ocular melanoma). Indoor tanning is particularly dangerous for younger users; people who begin indoor tanning during adolescence or early adulthood have a higher risk of getting melanoma.

The product is contraindicated for use on persons under the age of 18 years; the product must not be used if skin lesions or open wounds are present; the product should not be used on people who have had skin cancer or a family history of skin cancer; and people repeatedly exposed to UV radiation should be regularly evaluated for skin cancer. A contraindication means that the product is not indicated for use on persons under the age of 18 years of age.
