

# Examination Center Guidelines

**An appropriate disinfectant is required to be used during the examination.**

Candidates must follow all appropriate infection control and public protection procedures during all phases of the examination. In the event of a blood spill candidates will be expected to follow the appropriate Blood Spill procedure.

For objects that come in contact with intact skin, the appropriate disinfectant would be an environmental protection agency (EPA) registered, hospital grade bactericidal (esp. pseudomonacidal), virucidal, and fungicidal (quaternary ammonium compound - "quat") that is mixed and used according to the manufacturer's directions. For objects that come in contact with bodily fluids or blood, an appropriate disinfectant would include an EPA disinfectant registered as effective against "HIV/HBV". **NOTE: Disinfectant used for the examination should meet both guidelines.**

Manufacturer's labels are required on all disinfectants and hand sanitizers. Labels must be original or photocopied originals. **(Hand written or typed labels are NOT acceptable).**
